**FAST SPEED. 99% RELIABILITY (EVEN DURING PEAK TIMES)**  
**FRIENDLY, PROFESSIONAL 24/7 TECHNICAL**  
**SUPPORT FIBER OPTIC & SUPER FAST WIRELESS**  
**LINKS TECH-SAVVY STAFF**

Habari Node, or simply "Habari", is an Internet Service Provider headquartered in Arusha, Tanzania providing Internet services and a range of other ICT based business solutions across Tanzania with very humble and unique beginnings. Habari Node was jointly founded in 2010 by Afam (T) Limited and Arusha Node Marie to take over the Internet service activities of Arusha Node Marie, a society that has been operational since 1994. Habari Node is incorporated in Tanzania with certificate of incorporation number 75466 and licensed by Tanzania Communications Regulatory Authority as an Application Service Provider.

As part of its expansion strategy to expand its business outreach, Habari Node became a Public Limited Company in April 2017 and will be listed in the Dar Es Salaam Stock Exchange market (DSE) subsequently.

## WHAT WE OFFER

### Internet Connectivity

- » Fast Speed. 99% Reliability. Even during peak times!
- » Enterprise and home solutions available
- » Flexible & affordable packages
- » Free capacity @ night, weekends & holidays, and for special events
- » Flexible contracts

### Fiber-optic connectivity (FTTx)

Habari Fiber-optic setups enable higher speeds of delivery and greater bandwidth than some other kinds of infrastructure. We provide Fiber links to both residential (FTTH) and business (FTTB) users and also lease our fiber infrastructure to other key telecom players in Tanzania.

#### Benefits:

- » Affordable setup
- » Low latency
- » Professionally installed
- » Short deployment lead time and fix turnaround time

### Superfast Wireless Connectivity

We can still deliver high speed, reliable Internet access even outside our fiber coverage using our state of the art wireless network. Through our wireless technology, we are able to reach out to our customers in even the most remote locations with at least 50Mbps speeds.

### MPLS services

Habari Node's advanced MPLS Virtual Private Network Service seamlessly, rapidly and securely connects multiple business locations. With Habari's MPLS VPN, your domain is completely isolated from other customer domains via dedicated paths that run across our backbone, ensuring communications and data are kept private and secure.

#### Benefits:

- » Operational cost savings: - reduces network management expenses
- » Enhanced performance and Reliability: Prioritizes all allocated bandwidth to optimize network performance.
- » Scalability & Flexibility: Easy to add sites, change bandwidth and budget for network growth.
- » Reduced risk: Habari assumes responsibility for technology management and evolution

### IT Consulting & IT Support services

We are always available to advise and support you all the way making sure you achieve your business goals. Better Business starts with Habari Node. We value your business but most of all the relationship.
